THE EASTERN SHORE

No dashing surf or booming tide,
Pounds on the Eastern Shore,
Yet big ships glide on every side,
Far from the ocean's roar.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The dogwood blooms at the salt sea's edge,
Along its creeks and bays,
No other strand in all the land
Has such splendid water ways.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The pine trees mingle with the seas,
The wheat fields with the woods.
Strange to relate no other state
Is blessed with so many foods.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

The stranger's greeted with a smile
And welcomed with a nod,
For the folks all know the Eastern Sho'
Is direct from the hands of God.
For the land lies low on the Eastern Sho'
Where the tides of the Chesapeake flow.

**A GARDEN IS FOR PLEASURE**

Gardening has long been a tradition of the leisured and quiet life on the colonial estates of the Eastern Shore of Maryland's Chesapeake Bay region. Our organization has been developed with the one thought in mind, of helping our clientele who have located here increase the Eastern Shore's fame as a garden spot.

In this little book you will find listed plants that we know are particularly suited to the soils and climate of the Eastern Shore. All of the plants included with the exception of the fruit trees are grown and tested in our nurseries.

Planning Your Garden

The modern nursery client is usually interested in buying plants to give his home a setting or for the creation of an outdoor picture. It is the effect produced that counts. To create the garden picture, it should be planned. Planning can be done by simple staking on the grounds, by rough sketches, or by complete landscape plans. Any one of these methods can be used by us to suit your needs. The color, the texture, the growth and character of the plant materials used are considered in relation to their surroundings to produce the complete picture. A charge is made for detailed landscape plans.

FALL PLANTING OF EVERGREENS

There has been a lot of pros and cons about fall planting of evergreens, but after many years of trial and observation this has been our experience with it. Fall Planting in our estimation is excellent and the earlier it is done the better. By planting in the fall the job is out of the way and the trees are all set to make an early start in the spring, and they really get going much sooner than do spring planted trees. Then too they are better established to stand a hot dry summer should one follow. However, there are a few precautions to take to insure success with fall planting of evergreens. **FIRST**, do it as early as possible, **SECOND**, water them thoroughly immediately after planting and keep them well watered all fall, being especially sure to soak well just before freeze-up, or as one authority puts it "Put them to bed with wet feet." Then immediately after the ground is frozen for the winter, - and not before, mulch the trees lightly with straw, marsh hay, or evergreen boughs. Do not use anything that will pack down tightly such as leaves.

**PLANT EARLY, --- WATER WELL
MULCH AFTER FREEZE UP, and
you will have 100% success with
fall planting of evergreens.**
